

Copenhagen – Socialist Springboard

The Letters Editor

2nd November 2009

Copenhagen is a stage for oddball quasi-religious socialist gatherings. One such gathering was the 1910 International Socialist Congress. One of the keynote speakers was V.I. Lenin.

He went on to found the USSR in 1917.

His particular flavour of quasi-religion destroyed millions of people and wealth in obscene amounts.

In 1935 the Copenhagen Socialist Youth Conference was there as a beacon for the world's layabouts and con-merchants. Here the working youth of the world were told by Walter Held in his reviews of this frightening event that they needed "a new international organization with an intransigent revolutionary policy."

During 1936, 99% of the German electorate voted for the National Socialist (Nazi) party.

In Copenhagen during December 2009 the United Nations Climate Change conference will ask our great country to sign a treaty that will bring their overarching tyrannical and socialist style government into being.

This is a treaty of three purposes the first is government, the second is the transfer of wealth from the countries of the west to third world countries via an undefinable, and wholly unscientific "climate debt" and the third purpose of this new entity is enforcement. All of this is within Australia.

We will be taxed without any elected representation.

This government is seemingly intent on destroying the social fabric of our free and prosperous society. It should be a large warning that the meeting is being held in the socialist springboard that is Copenhagen.
