

Corruption in High Places

The news reveals that Martin Ferguson has been lobbying industry to sweeten up their attitudes to the ETS tax. The sensible CEO of Woodside, Don Voelte, who has opposed ETS from day one, has been silenced with a bribe.

LNG will now have concessions that before it did not. This, after a visit by Santa Claus Martin.

If a businessman engaged in such behaviour the ACCC would fine and jail him.

Why should Martin Ferguson be treated differently than business people are?
