

High Priest Garnaut cannot read from the hymn book

1. Ross Garnaut, a Kyoto advocate, wants to see a huge tax imposed upon the population to satisfy his ego as a "Climate Specialist".

He is not a climate specialist. He is an economist.

2. This pest even thinks that a tax can increase agricultural production. Such nonsense could only exist in climate models.

3. And many journalists are also Kyoto priests. They demonstrate their collectivist determinism for the population as has Garnaut.

As experienced and long standing journalists many have failed miserably in their duty to bring to light the myth, that human activity of producing CO2 affects the climate.

It does not. But the farce nevertheless, if implemented, will wreck what remains of Australian industry, and impose large irreversible taxes on the population.

Most of the media's journalists have failed to warn the public about proposed totalitarian like economic controls, which will dramatically lower the living standards of all.

5. The Labor leadership appears to know how destructive the proposals to implement an ETS or Carbon Tax are, but are afraid of losing Green preferences; so they continue with the farce.

6. Kyoto-ism is the most intrusive and the most aggressive assault ever, on economic growth, the security of private property rights, and, seriously degrades the population's personal and economic liberty.

Even Japan when asked to extend the Kyoto farce on 1.12.2010 said "Japan will not inscribe its target under the Kyoto protocol on any conditions or under any circumstances."

It slows the fight against poverty; it stifles progress in health, education, the environment, biodiversity, public safety, science, and is one of the key pillars opposing the origin of new wealth and peaceful progress of the human civilization itself.

It is a terrible religion. It's Australian high priest Ross Garnaut needs to have his wings clipped, soonest.

What this thug should be doing is directing his efforts in climate modelling to predicting what weather events we are going to have in the here and now so we can organise our affairs. Our flooding advice is barely above negligent and so is our Cyclone warning system. I note most people in Nth. Queensland were relying on the US NAVY modelling of cyclone YASI and not our own Bureau of Meteorology. The BOM showed YASI hitting Cairns when the US NAVY predicted the path almost perfectly 2+ hours drive south of Cairns.

7. Melanie Phillips wrote in her book outlining global anglosphere hysteria and rising tribalism "The World Turned Upside Down, p. 32":

"Manmade Global Warming theory lies in shreds, and yet this fact is denied and ruthless attempts are made to suppress it, even as the counterargument has gained ground and exposed the hollowness of its claims. That is because the theory is not science. It is rather a quasi-religious belief system; and the only reason it was sustained for so long was through the abuse of authority and intimidation of dissent."

regards,

Mac Nichols
