

The Fuhrer To Virtually Ban Electricity Produced From Coal

Why have I spent two years and 83 pages of posts, to demonstrate that the Global Warming Hysteria is a hoax that is intended to strip down our economy with new taxes. A Hoax that will run everyone's daily personal energy decisions through London and Wall Street traders in "Carbon Credits" - hundreds of \$billions will be skimmed off the average American persons.

Coal power provides 49% of America's electric power. There is NO WAY to replace this base load with intermittent solar and wind power!!!!!! Listen here as B. Hussein Obama calls CO2 a "pollutant", and for those burn it to be bankrupted!!!!!!!!!!

This is the ultimate Marxist tool, to deprive the proletariat of their access to energy. It is a ticket to spreading poverty far and wide, crushing energy intensive industry and sending millions more American jobs to CHINA. Hows that for spreading the wealth?
