

[ACT Outranks WA Economically](#)

Per the below article from today's "The West" and the attached Gross State Product document generated by the ACT treasury <http://www.treasury.act.gov.au/snapshot/>:

It is clear that the ACT is currently enjoying a robust economy! It is the boom Territory! Yet they produce virtually nothing.

Per the GSP document attached:

1. Gross household disposable income per capita in the ACT in 2008-09 was the highest of all jurisdictions (\$55,257) and 51% higher than the national average (\$36,602).
2. The Public administration and safety industry continues to be the largest industry in the ACT with a 31.4% share of current price GSP in 2008-09.
3. The ACT recorded higher GSP growth relative to the national economy, mainly due to:
 - * underrepresentation of the manufacturing industry in the ACT economy, which in 2008-09 was a **significant drag** on the national economy; and
 - * overrepresentation of **public administration** in the ACT economy, which contributed positively to the national economy.

Any person with an iota of economic knowledge can see that Australia is being MILKED by a centralised group of Bureaucrats. They produce NOTHING. They only destroy capital and are CLEARLY consuming it at a great pace.

Canberra is the financial black hole we all do not need.

These are not statistics demonstrating a free and prosperous society. These are the statistics of a blooming fascist state.

Anyone interested further can read Mises book on the difference between bureaucratic management and profit and loss management based upon the INDIVIDUAL. You can get a copy here gratis:

<http://mises.org/Books/bureaucracy.pdf>

Have you done your due diligence for your family, for Australia?

Regards,

Mac Nichols
Mining Engineer
